SEEDR-KODI PLUGIN

Kodi is a free and open-source media player software application developed by the XBMC Foundation. It's a powerful entertainment hub that allows you to: Play and view most videos, music, podcasts, and other digital media files, Organize and manage your media library, Stream content from the internet and Customize your experience with addons and skins. It runs on multiple platforms including Windows, macOS, Linux, Android, and iOS.

This Seedr-Kodi addon allows you to access and stream your Seedr.cc cloud storage content directly through Kodi desktop and mobile applications.

How to Install Seedr Plugin for Kodi

This guide will help you install the Seedr plugin on your Kodi application (desktop or mobile application) to access your Seedr.cc files.

What You Need

- Kodi media center application installed on your device desktop or mobile phone.
- A Seedr.cc account
- Internet connection

Installation Steps

Step 1: Download the Repository
1. Download the repository file at link: **repository.seedr-1.0.1.zip**
2. Save it to a location you can easily find on your device.

Step 2: Install the Repository in Kodi
1. Open Kodi on your device
2. Go to **Add-ons** (from the main menu)
3. Click on **Install from zip file**
4. Browse and select the `repository.seedr-1.0.1.zip` file you downloaded
5. Wait for the "Add-on installed" notification

Step 3: Install the Seedr Plugin
1. In Kodi, go to **Add-ons** → **Install from repository**
2. Select **"Seedr Repository"**
3. Navigate to **Video Add-ons**
4. Find and select **"Seedr"**
5. Click **"Install"**
6. Wait for installation to complete

Alternative Installation Method
If the zip file method doesn't work, try this:
1. In Kodi, go to **Settings** → **File Manager**
2. Select **"Add source"**
3. Enter this URL: `https://jose987654.github.io/kodi-addons/`
4. Name it "Seedr Repository"
5. Go to **Add-ons** → **Install from zip file**
6. Select "Seedr Repository"
7. Choose `repository.seedr-1.0.1.zip`
8. Follow steps 3-6 from the main installation method above.

```
## First Time Setup
1. Launch the Seedr addon from your installed add-ons
2. You'll see a verification URL and code on screen
3. On your phone/computer, open a web browser and go to the URL shown
4. Log in to your Seedr.cc account and authorize the application
5. Return to Kodi - the plugin should now be connected to your Seedr account

## How to Use
- Open the Seedr addon from your Video Add-ons
- Browse through your Seedr.cc folders
- Click on any video file to start streaming
- Audio files can also be played directly
- Use the back button or context menu to navigate between folders

## Troubleshooting
- Make sure you have an active internet connection
- Verify your Seedr.cc account is working by logging in through their website
- If the addon doesn't appear, try restarting Kodi
- For mobile devices, ensure Kodi has permission to access network/internet

## Need Help?
If you encounter any issues, double-check that:
1. The repository was installed successfully
2. You completed the authorization process
3. Your Seedr.cc account has files to access.
